Electronic Sales Performance Analysis Report

1. Introduction

This report presents an analysis of electronic sales data consisting of over 20,000 transactions. The objective is to derive meaningful insights related to sales performance, customer behavior, and product trends, and provide actionable recommendations for business growth.

2. Objectives

- Analyze sales trends over time
- Identify top-performing products
- Understand customer demographics
- Evaluate payment preferences
- Provide business recommendations

3. Dataset Overview

The dataset includes transaction-level data with attributes such as product type, purchase amount, customer demographics (age, gender), payment methods, and purchase date.

4. Methodology

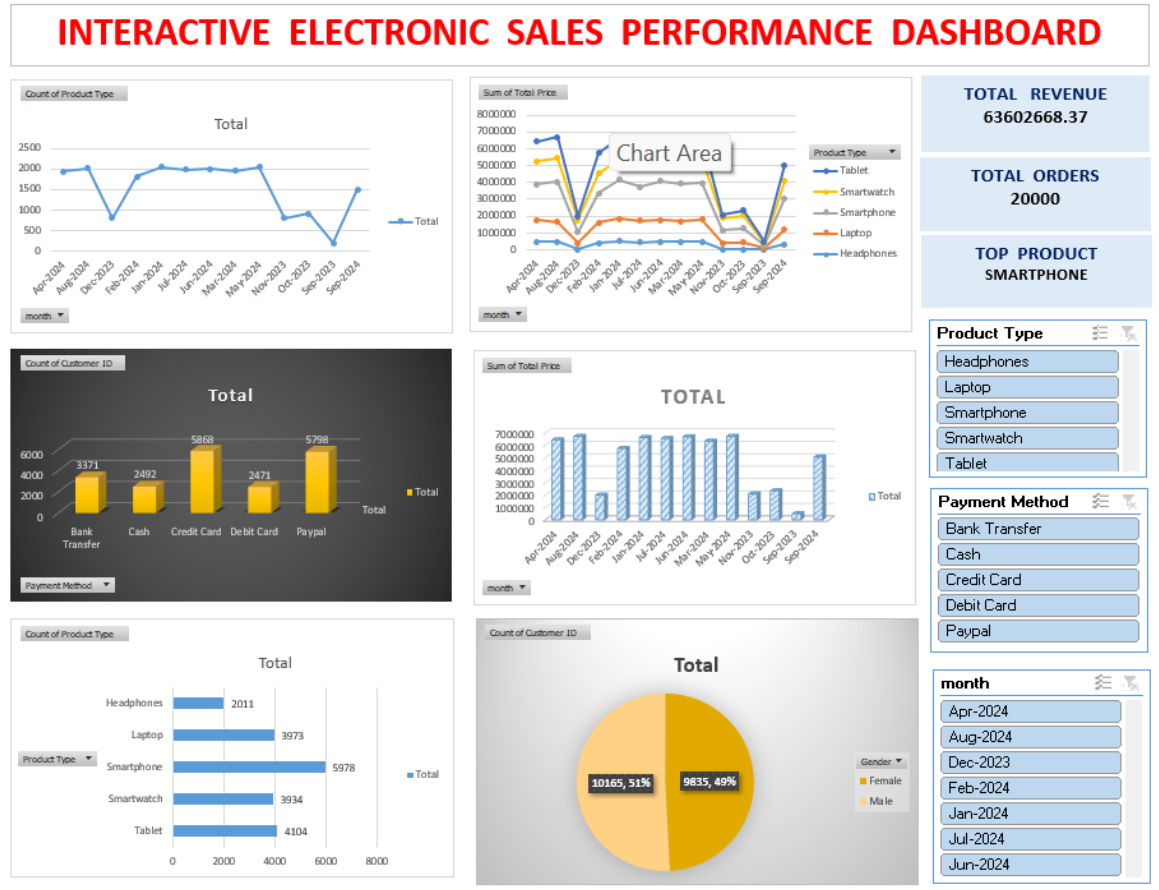
- Data Cleaning: Removed duplicates and handled missing values
- Feature Engineering: Created month column for time-based analysis
- Data Analysis: Performed aggregation and segmentation
- Visualization: Built interactive Excel dashboard

5. Dashboard Overview

The dashboards summarize key business metrics and insights using Excel and Tableau.

- **Excel Dashboard**
    - Used for initial data analysis and reporting
    - Provides structured and tabular insights
- **Tableau Dashboard**
    - Used for advanced interactive visualization
    - Enhances storytelling with dynamic charts and filters

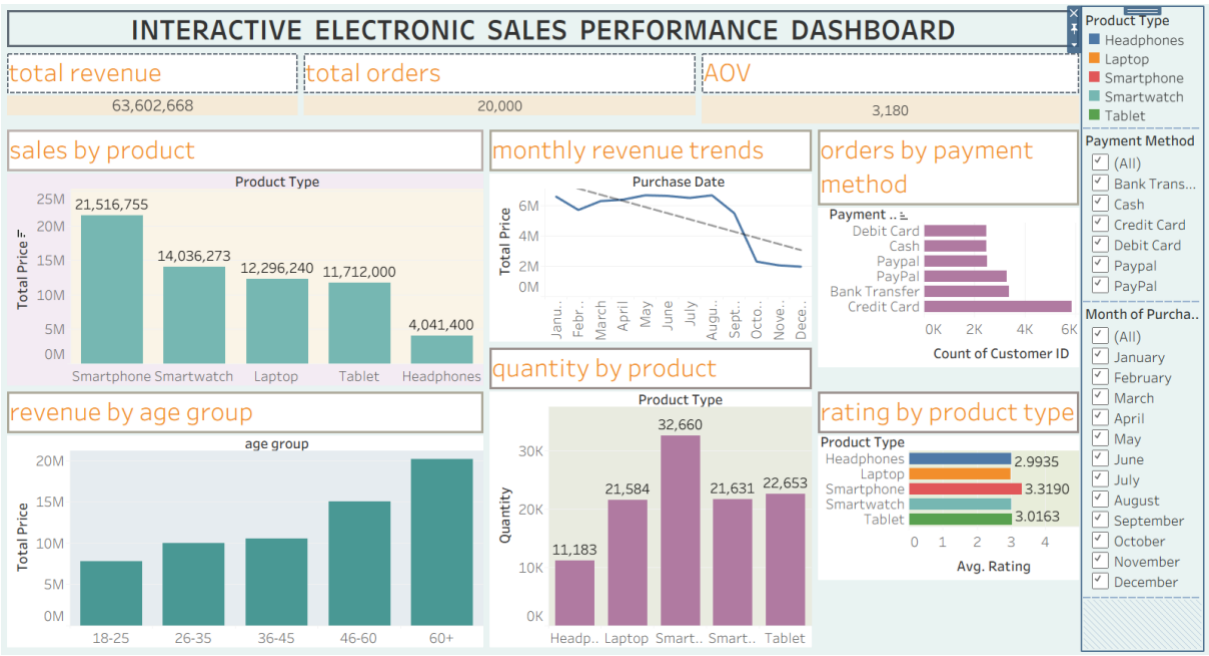
1. Excel Dashborad :



2 .Tableau Dashboard :

An advanced interactive dashboard was built using Tableau to enhance visualization and storytelling.

- KPI metrics: Total Revenue, Total Orders, AOV
- Product-wise sales insights
- Monthly revenue trends
- Customer segmentation insights
- Payment method analysis
- Ratings and quantity analysis



6. Key Insights

1. Smartphone category generates the highest revenue among all product types.
2. Sales show fluctuations across months, indicating seasonal demand.
3. PayPal and card payments are widely used among customers.
4. A specific age group contributes significantly to overall sales.
5. Male and female customer distribution is relatively balanced.

7. Business Recommendations

- Focus marketing efforts on high-performing products like smartphones
- Launch seasonal campaigns during peak months
- Improve user experience for popular payment methods
- Target key customer segments with personalized offers
- Optimize inventory based on demand trends

8. Conclusion

This analysis demonstrates how data-driven insights can improve decision-making in sales and marketing. The dashboard provides a clear and interactive way to monitor business performance.
